6 (2) Increasing pressure from California's rap-

 12 and inspiration for all Americans.

1           (4) Continuation of military activities, including  
2           overflights, military maneuvers, testing and evalua-  
3           tion, and other activities without limit to frequency  
4           is not incompatible with the protection and proper  
5           management of the wilderness and wild and scenic  
6           river resources designated by this Act.

7           (5) Wildfire management activities necessary to  
8           protect public health and safety and private property  
9           are fully allowable in wilderness areas and the Sec-  
10          retary may take any measures deemed necessary to  
11          control or prevent fires.

12          (6) These lands shall be included in the Na-  
13          tional Wilderness Preservation System and the Na-  
14          tional Wild and Scenic Rivers System, in order to—

15                (A) preserve the unique wild and natural  
16                features of these landscapes;

17                (B) protect a diverse array of ecosystems,  
18                plants, animals, geologic structures and hydro-  
19                logic features that represent the natural splen-  
20                dor of California;

21                (C) protect and preserve historical and cul-  
22                tural archeological sites associated with ancient  
23                Indian cultures and the settlement of Cali-  
24                fornia;

1 (D) protect and preserve areas that con-  
2 tinue to be used by Native American tribes for  
3 spiritual, cultural, or subsistence practices;

4 (E) protect watersheds, including those  
5 that play an essential role in providing munic-  
6 ipal and agricultural water supplies;

7 (F) provide opportunities for compatible  
8 outdoor recreation, including horseback riding  
9 on saddle and pack stock, hunting and fishing,  
10 hiking and camping, whitewater rafting, and ex-  
11 cursions led by commercial outfitters;

12 (G) retain and enhance opportunities for  
13 scientific research in pristine ecosystems; and

14 (H) promote the recovery of threatened  
15 and endangered species, including salmon and  
16 steelhead.
