IN THE SENATE OF THE UNITED STATES

SEPTEMBER 29, 2006

Mr. SARBANES introduced the following bill; which was read twice and referred to the Committee on Environment and Public Works

A BILL

To establish the bipartisan and independent Commission on Global Resources, Environment, and Security, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Global Resources, En-
5 vironment, and Security Commission Act of 2006”.

6 **SEC. 2. FINDINGS AND PURPOSE.**

7 (a) FINDINGS.—Congress finds that—

8 (1) humans are placing increasing and poten-
9 tially unsustainable pressures on—

10 (A) the Earth;

1 (B) ecosystems; and

2 (C) natural resources;

3 (2) economic prosperity, human health, and
4 peaceful international relations depend on the con-
5 tinued existence of—

6 (A) a clean environment; and

7 (B) the sustainability of natural resources
8 and ecosystem services;

9 (3) increasing scarcities of natural resources
10 and environmental degradation can cause economic
11 losses and contribute to—

12 (A) disease;

13 (B) famine;

14 (C) increased vulnerability to natural dis-
15 asters;

16 (D) mass migration;

17 (E) disruption of trade; and

18 (F) violent conflict;

19 (4) those potential disasters can—

20 (A) weaken all members of the inter-
21 national community; and

22 (B) create serious threats to the national
23 security of the United States;

24 (5) many scientific studies reveal that the rapid
25 increases in global population and the new global se-

1 security problems have, and will likely continue to
2 have, serious impacts on the United States, includ-
3 ing—

4 (A) inadequate access to sources of healthy
5 freshwater;

6 (B) loss of biodiversity;

7 (C) climate change;

8 (D) marine overfishing and pollution;

9 (E) transboundary air pollution;

10 (F) nuclear and chemical contamination;

11 (G) deforestation;

12 (H) invasive species migration; and

13 (I) soil degradation and desertification;

14 (6) the complex and interconnected nature of
15 those problems requires new forms of cooperation
16 between—

17 (A) the stakeholders of the United States;

18 and

19 (B) the United States and other countries;

20 (7) according to the National Environmental
21 Policy Act of 1969 (42 U.S.C. 4321 et seq.), it is
22 the national policy of the United States—

23 (A) to recognize the worldwide and long-
24 range character of environmental problems; and

1 (B) to lend appropriate support to initia-
2 tives, resolutions, and programs designed to
3 maximize international cooperation in antici-
4 pating and preventing a decline in the quality
5 of the world environment;

6 (8) the United States is in a unique position to
7 be able to share scientific and technical expertise on
8 the world stage in ways that—

9 (A) benefit all persons; and

10 (B) provide opportunities in the United
11 States for—

12 (i) economic growth;

13 (ii) investment; and

14 (iii) innovation; and

15 (9) the leadership of the United States on the
16 advancement of global environmental security serves
17 the domestic interests of the United States while
18 strengthening relationships between the United
19 States and other countries.

20 (b) PURPOSE.—The purpose of this Act is to estab-
21 lish a bipartisan and independent commission to make rec-
22 ommendations for a coordinated, comprehensive, and long-
23 range national policy for new and existing strategies initi-
24 ated by the United States to promote global environmental
