1 **SEC. 3. DEFINITIONS.**

2 In this Act:

3 (1) ADMINISTRATOR.—The term “Adminis-  
 4 trator” means the Administrator of the Office of Ju-  
 5 venile Justice and Delinquency Prevention.

6 (2) COMMUNITY.—The term “community”  
 7 means a unit of local government or an Indian  
 8 Tribe, or part of such a unit or Tribe, as determined  
 9 by such a unit or Tribe for the purpose of applying  
 10 for a grant under this Act.

11 (3) DESIGNATED GEOGRAPHIC AREA.—The  
 12 term “designated geographic area” means a 5-digit  
 13 postal ZIP Code assigned to a geographic area by  
 14 the United States Postal Service.

15 (4) EVIDENCE-BASED.—The term “evidence-  
 16 based”, when used with respect to a practice relating  
 17 to juvenile delinquency and criminal street gang ac-  
 18 tivity prevention and intervention, means a practice  
 19 (including a service, program, or strategy) that has  
 20 statistically significant juvenile delinquency and

1 criminal street gang activity reduction outcomes  
2 when evaluated by—

3 (A) an experimental trial, in which partici-  
4 pants are randomly assigned to participate in  
5 the practice that is the subject of the trial; or

6 (B) a quasi-experimental trial, in which the  
7 outcomes for participants are compared with  
8 outcomes for a control group that is made up  
9 of individuals who are similar to such partici-  
10 pants.

11 (5) INTERVENTION.—The term “intervention”  
12 means the provision of programs and services that  
13 are supported by research, are evidence-based or  
14 promising practices, and are provided to youth who  
15 are involved in, or who are identified by evidence-  
16 based risk assessment methods as being at high risk  
17 of continued involvement in, juvenile delinquency or  
18 criminal street gangs, as a result of indications that  
19 demonstrate involvement with problems such as tru-  
20 ancy, substance abuse, mental health treatment  
21 needs, or siblings who have had involvement with ju-  
22 venile or criminal justice systems.

23 (6) JUVENILE DELINQUENCY AND CRIMINAL  
24 STREET GANG ACTIVITY PREVENTION.—The term  
25 “juvenile delinquency and criminal street gang activ-

1       ity prevention” means the provision of programs and  
2       resources to children and families who have not yet  
3       had substantial contact with criminal justice or juve-  
4       nile justice systems, that—

5               (A) are designed to reduce potential juve-  
6       nile delinquency and criminal street gang activ-  
7       ity risks; and

8               (B) are evidence-based or promising edu-  
9       cational, health, mental health, school-based,  
10      community-based, faith-based, parenting, job  
11      training, social opportunities and experiences,  
12      or other programs, for youth and their families,  
13      that have been demonstrated to be effective in  
14      reducing juvenile delinquency and criminal  
15      street gang activity risks.

16       (7) PROMISING.—The term “promising”, when  
17      used with respect to a practice relating to juvenile  
18      delinquency and criminal street gang activity preven-  
19      tion and intervention, means a practice that is not  
20      evidence-based, but—

21              (A) that has outcomes from an evaluation  
22      that demonstrate that such practice reduces ju-  
23      venile delinquency and criminal street gang ac-  
24      tivity; or

1 (B) about which a study is being con-  
2 ducted to determine if such practice is evidence-  
3 based.

4 (8) YOUTH.—The term “youth” means—

5 (A) an individual who is 18 years of age or  
6 younger; or

7 (B) in any State in which the maximum  
8 age at which the juvenile justice system of such  
9 State has jurisdiction over individuals exceeds  
10 18 years of age, an individual who is such max-  
11 imum age or younger.

12 **SEC. 4. FINDINGS.**

13 The Congress finds as follows:

14 (1) Youth gang crime has taken a toll on a  
15 number of urban communities, and senseless acts of  
16 gang-related violence have imposed economic, social,  
17 and human costs.

18 (2) The use of a wide range of evidence-based  
19 and promising programs, integrated into a youth-ori-  
20 ented community system of care, has been dem-  
21 onstrated to reduce youth violence, delinquency, and  
22 crime risks, as well as criminal justice, public assist-  
23 ance, victim assistance, and other costs.

24 (3) Coordinated efforts of stakeholders in the  
25 juvenile justice system in a local community, to-

1       gether with other organizations and community  
2       members concerned with the safety and welfare of  
3       children, have a strong record of demonstrated suc-  
4       cess in reducing the impact of youth and gang-re-  
5       lated crime and violence, as demonstrated in Boston,  
6       Massachusetts, Chicago, Illinois, Richmond, Vir-  
7       ginia, Los Angeles, California, and other commu-  
8       nities.

9               (4) Investment in prevention and intervention  
10       programs for children and youth, including quality  
11       early childhood programs, comprehensive evidence-  
12       based school, after school, and summer school pro-  
13       grams, mentoring programs, mental health and  
14       treatment programs, evidence-based job training  
15       programs, and alternative intervention programs,  
16       has been shown to lead to decreased youth arrests,  
17       decreased delinquency, lower recidivism, and greater  
18       financial savings from an educational, economic, so-  
19       cial, and criminal justice perspective.

20              (5) Criminal justice costs have become burden-  
21       some in many States and cities, requiring reductions  
22       in vital educational, social, welfare, mental health,  
23       and related services.

1           (6) Targeting interventions at special youth risk  
2 groups and focusing upon relatively low-cost inter-  
3 ventions increases the probability of fiscal benefit.

4           (7) Savings achieved through early intervention  
5 and prevention are significant, especially when non-  
6 criminal justice social, educational, mental health,  
7 and economic outcomes are considered.

8           (8) Evidence-based intervention treatment fa-  
9 cilities have been shown to reduce youth delinquency  
10 and to be cost-effective.

11          (9) The prevention of child abuse and neglect  
12 can help stop a cycle of violence and save up to  
13 \$5.00 for every \$1.00 invested in preventing such  
14 abuse and neglect.

15          (10) Quality early childhood education pro-  
16 grams have been demonstrated to help children start  
17 school ready to learn and to reduce delinquency and  
18 criminal street gang activity risks.

19          (11) Evidence-based mentoring programs have  
20 been shown to prevent youth drug abuse and vio-  
21 lence.

22          (12) Evidence-based school-based comprehen-  
23 sive instructional programs that pair youth with re-  
24 sponsible adult mentors have been shown to have a  
25 strong impact upon delinquency prevention.

1           (13) After-school programs that connect chil-  
2           dren to caring adults and that provide constructive  
3           activities during the peak hours of juvenile delin-  
4           quency and criminal street gang activity, between  
5           3:00 and 6:00 in the afternoon, have been shown to  
6           reduce delinquency and the attendant costs imposed  
7           on the juvenile and criminal justice systems.

8           (14) States with higher levels of educational at-  
9           tainment have been shown to have crime rates lower  
10          than the national average. Researchers have found  
11          that a 5 percent increase in male high school grad-  
12          uation rates would produce an annual savings of al-  
13          most \$5,000,000,000 in crime-related expenses.

14          (15) Therapeutic programs that engage and  
15          motivate high-risk youth and their families to  
16          change behaviors that often result in criminal activ-  
17          ity have been shown to significantly reduce recidi-  
18          vism among juvenile offenders, and significantly re-  
19          duce the attendant costs of crime and delinquency  
20          imposed upon the juvenile and criminal justice sys-  
21          tems.

22          (16) Comprehensive programs that target kids  
23          who are already serious juvenile offenders by ad-  
24          dressing the multiple factors in peer, school, neigh-  
25          borhood, and family environments known to be re-

1       lated to delinquency can reduce recidivism among ju-  
2       venile offenders and save the public significant eco-  
3       nomic costs.

4           (17) There are many alternatives to incarcer-  
5       ation of youth that have been proven to be more ef-  
6       fective in reducing crime and violence at the Na-  
7       tional, State, local, and tribal levels, and the failure  
8       to provide for such effective alternatives is a perva-  
9       sive problem that leads to increased youth, and later  
10      adult, crime and violence.

11          (18) Drug- and alcohol-dependent youth, and  
12      youth dually diagnosed with addiction and mental  
13      health disorders, are more likely to become involved  
14      with the juvenile justice system than youth without  
15      such risk factors, absent appropriate prevention and  
16      intervention services.

17          (19) Research funded by the Department of  
18      Justice indicates that gang-membership is short-  
19      lived among adolescents. With very few youth re-  
20      maining gang-involved throughout their adolescent  
21      years, ongoing opportunities for intervention exist.

22          (20) Excessively punitive juvenile justice poli-  
23      cies, including over-reliance on incarceration and  
24      confinement of youth, particularly in the early stages  
25      of delinquent behavior and for non-violent delinquent

1 behavior, have been shown to increase long-term  
2 crime risks.

3 (21) Children of color are over-represented rel-  
4 ative to the general population at every stage of the  
5 juvenile justice system.

6 (22) The rise in homicides in several cities in  
7 recent years followed declines in Federal funding  
8 provided for law enforcement, educational, health  
9 and mental health, social services, and other support  
10 to localities for youth, their families, and other com-  
11 munity-oriented programs and approaches.

12 (23) Direct expenditure for jails and prisons,  
13 correctional personnel, prosecution, and law enforce-  
14 ment strategies that lead to increased incarceration  
15 have been steadily increasing. In fiscal year 2005,  
16 Federal, State, and local governments spent an esti-  
17 mated \$204,000,000,000 for police protection, cor-  
18 rections, and judicial expenses, a 5.5 percent in-  
19 crease over the previous year.
