

110TH CONGRESS
2D SESSION

H. R. 7146

To distribute emission allowances under a domestic climate policy to facilities in certain domestic energy-intensive industrial sectors to prevent an increase in greenhouse gas emissions by manufacturing facilities located in countries without commensurate greenhouse gas regulation, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

SEPTEMBER 26, 2008

Mr. INSLEE (for himself and Mr. DOYLE) introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To distribute emission allowances under a domestic climate policy to facilities in certain domestic energy-intensive industrial sectors to prevent an increase in greenhouse gas emissions by manufacturing facilities located in countries without commensurate greenhouse gas regulation, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Carbon Leakage Pre-
5 vention Act”.

1 **SEC. 2. FINDINGS.**

2 The Congress finds the following:

3 (1) All domestic and foreign industries should
4 contribute to climate stabilization.

5 (2) Domestic producers of certain energy-inten-
6 sive products subject to international competition
7 present a unique challenge for United States climate
8 policy because increased costs associated with com-
9 pliance may unintentionally cause domestic industry
10 to divert new investments and production to facili-
11 ties located in countries without commensurate
12 greenhouse gas regulation.

13 (3) Without exempting any industries, the
14 United States must move forward with economy-
15 wide action on climate change while reducing incen-
16 tives for producers to relocate to unregulated coun-
17 tries, which could displace both jobs and emissions.

18 (4) International agreements are the most ap-
19 propriate means to reduce emissions from energy-in-
20 tensive industries because unilateral domestic efforts
21 to reduce greenhouse gas emissions could accelerate
22 the relocation of energy-intensive manufacturing
23 abroad.

24 (5) Carbon leakage can be mitigated substan-
25 tially through the output-based distribution of emis-
26 sion allowances.

1 (6) Output-based emission allowance distribu-
2 tion is an appropriate temporary measure that
3 should complement other targeted domestic and
4 international policies and agreements meant to en-
5 courage United States trading partners to substan-
6 tially reduce global greenhouse gas emissions.

7 **SEC. 3. PURPOSES.**

8 The purposes of this Act are as follows:

9 (1) To compensate certain facilities from a sub-
10 set of eligible domestic industrial sectors for carbon
11 emission costs incurred under any cap-and-trade
12 program.

13 (2) To limit compensation to facilities in eligible
14 industrial sectors to an amount of emission allow-
15 ances that will prevent carbon leakage while also re-
16 warding innovation and facility-level investments in
17 performance improvements.

18 (3) To provide compensation to the owners and
19 operators of facilities for both the direct and indirect
20 costs of purchasing emission allowances needed for
21 compliance with a domestic cap-and-trade program,
22 but not for costs associated with other related or un-
23 related market dynamics.

1 (4) To prevent carbon leakage resulting from
2 direct and indirect compliance costs incurred under
3 a domestic cap-and-trade program.

4 **SEC. 4. DEFINITIONS.**

5 In this Act:

6 (1) The term “Administrator” means the Ad-
7 ministrator of the Environmental Protection Agency.

8 (2) The term “cap-and-trade program” means
9 an economy-wide program enacted by Congress that
10 distributes or auctions emission allowances for the
11 control of greenhouse gas emissions.

12 (3) The term “carbon dioxide equivalent”
13 means, for each greenhouse gas, the quantity of
14 greenhouse gas that the Administrator determines
15 makes the same contribution to global warming as
16 1 metric ton of carbon dioxide.

17 (4) The term “carbon leakage” means any sub-
18 stantial increase (as determined by the Adminis-
19 trator) in greenhouse gas emissions by manufac-
20 turing facilities located in countries without com-
21 mensurate greenhouse gas regulation caused by an
22 incremental cost of production increase in the
23 United States as a result of a domestic cap-and-
24 trade program.

1 (5) The term “covered facility” means, for each
2 calendar year, a facility that emits greenhouse gases
3 in that year and that has an obligation to submit
4 emission allowances for such greenhouse gas emis-
5 sions under any cap-and-trade program.

6 (6) The term “emission allowance” means an
7 authorization, under any cap-and-trade program, to
8 emit 1 carbon dioxide equivalent of greenhouse gas.

9 (7) The term “facility” means 1 or more build-
10 ings, structures, or installations of an entity on 1 or
11 more contiguous or adjacent properties located in
12 the United States.

13 (8) The term “greenhouse gas” means any gas
14 designated as a greenhouse gas under a cap-and-
15 trade program.

16 (9) The term “output” means the total tonnage
17 or other standard unit of production (as determined
18 by the Administrator) produced by a manufacturing
19 facility.

20 **SEC. 5. DISTRIBUTION OF EMISSION ALLOWANCES TO CER-**
21 **TAIN ENERGY-INTENSIVE MANUFACTURING**
22 **FACILITIES.**

23 (a) DISTRIBUTION OF EMISSION ALLOWANCES.—

24 (1) IN GENERAL.—The Administrator shall an-
25 nually distribute emission allowances, in amounts

1 calculated under subsection (c), to the owners and
2 operators of facilities in eligible industrial sectors
3 and subsectors identified under subsection (b), sub-
4 ject to the maximum quantity limitation established
5 under paragraph (2) of this subsection.

6 (2) MAXIMUM.—The maximum quantity of
7 emission allowances distributed under paragraph (1)
8 each year shall equal 15 percent of the total quan-
9 tity of allowances distributed or auctioned under a
10 cap-and-trade program for emissions occurring dur-
11 ing the first year for which allowances are required
12 to be submitted under such program. If the total al-
13 lowances calculated under subsection (c) exceed such
14 maximum, the Administrator shall reduce the
15 amount distributed to owners and operators under
16 paragraph (1) on a pro rata basis.

17 (b) ELIGIBLE INDUSTRIAL SECTORS AND SUBSEC-
18 TORS.—

19 (1) IN GENERAL.—Not later than January 1,
20 2011, the Administrator shall promulgate a rule
21 identifying, based on the criteria under paragraph
22 (2), the industrial sectors and subsectors eligible to
23 receive emission allowances under this Act. The Ad-
24 ministrator shall consider, among others, the iron,
25 steel, pulp, paper, cement, rubber, basic chemicals,

1 glass, industrial ceramics, and aluminum and other
2 non-ferrous metals industrial sectors and subsectors.

3 (2) CRITERIA.—To minimize the potential for
4 carbon leakage, in identifying eligible sectors and
5 subsectors under paragraph (1), the Administrator
6 shall take into account each of the following:

7 (A) The greenhouse gas intensity of the
8 domestic production, including direct emissions
9 from the combustion of fuels and process emis-
10 sions at the facility and the indirect emissions
11 by electric power providers.

12 (B) The potential for greater foreign
13 sourcing of production or services and the effect
14 of international competition on domestic pro-
15 duction.

16 (C) The effect of international markets on
17 product pricing.

18 (D) The potential for net imports to in-
19 crease or exports to decrease (resulting in a loss
20 of market share held by domestic manufactur-
21 ers to manufacturers located in other countries)
22 caused by the direct and indirect compliance
23 costs under a domestic cap-and-trade program.

1 (E) The state of international negotiations,
2 agreements, and activities to reduce global
3 greenhouse gas emissions.

4 (c) CALCULATION OF ALLOWANCES.—

5 (1) COVERED FACILITIES.—Except as provided
6 in subsection (a)(2), the quantity of emission allow-
7 ances distributed by the Administrator under this
8 Act for a calendar year to the owner or operator of
9 a covered facility shall be equal to the sum of the
10 facility's direct compliance allowance factor and the
11 facility's indirect carbon allowance factor. Calcula-
12 tions under this paragraph shall be based on data
13 from 2 calendar years prior to the calendar year of
14 distribution. For purposes of determining such
15 amounts:

16 (A) DIRECT COMPLIANCE ALLOWANCE
17 FACTOR.—The direct compliance allowance fac-
18 tor for a facility for a calendar year is the
19 amount obtained by multiplying the output of
20 the facility by 85 percent of the average ton-
21 nage of greenhouse gas emissions per unit of
22 output for all facilities in the sector or sub-
23 sector, as determined by the Administrator
24 based on reports provided under subparagraph
25 (C).

1 (B) INDIRECT CARBON ALLOWANCE FAC-
2 TOR.—The indirect carbon allowance factor for
3 a facility for a calendar year is the product ob-
4 tained by multiplying the total output of the fa-
5 cility by the fraction set forth in clause (i) (the
6 emissions intensity factor) and the fraction set
7 forth in clause (ii) (the electricity efficiency fac-
8 tor) for the year concerned.

9 (i) EMISSIONS INTENSITY FACTOR.—

10 (I) REGULATED ELECTRICITY
11 MARKETS.—In a regulated electricity
12 market, the emissions intensity factor
13 is the average tonnage of greenhouse
14 gas emissions per kilowatt hour of the
15 electricity purchased by the facility, as
16 determined by the facility owner or
17 operator based on reports provided
18 under subparagraph (D).

19 (II) WHOLESALE COMPETITIVE
20 ELECTRICITY MARKETS.—In a whole-
21 sale competitive electricity market, the
22 emissions intensity factor is the aver-
23 age tonnage of greenhouse gas emis-
24 sions per kilowatt hour of the mar-
25 ginal source of supply of electricity

1 purchased by the facility, as deter-
2 mined by the facility owner or oper-
3 ator based on reports provided under
4 subparagraph (D).

5 (ii) ELECTRICITY EFFICIENCY FAC-
6 TOR.—The electricity efficiency factor is
7 85 percent of the average amount of elec-
8 tricity (in kilowatt hours) used per ton of
9 production for all facilities in the sector or
10 subsector concerned, as determined by the
11 Administrator based on reports provided
12 under subparagraph (C).

13 (C) REPORT TO ADMINISTRATOR.—Each
14 owner or operator of a facility in any sector or
15 subsector identified under subsection (b) and
16 each department, agency, or instrumentality of
17 the United States shall provide the Adminis-
18 trator with such information as the Adminis-
19 trator finds necessary to determine the direct
20 compliance allowance factor and the indirect
21 carbon allowance factor for each facility subject
22 to this Act.

23 (D) GREENHOUSE GASES FROM ELEC-
24 TRICITY.—Each person selling electricity to the
25 owner or operator of a facility in any sector or

1 subsector identified under subsection (b) shall
2 provide the owner or operator of the facility and
3 the Administrator, on a quarterly basis, such
4 information as is required to determine the
5 emissions intensity factor under subparagraph
6 (B)(i).

7 (E) EMISSIONS INTENSITY FACTOR RE-
8 Duction.—The numerator of the emissions in-
9 tensity factor under subparagraph (B)(i) shall
10 be reduced by the tonnage of allowances the
11 Administrator determines are distributed at no
12 cost under any cap-and-trade program to the
13 person making the sale of electricity and are
14 used by such person to prevent electricity rate
15 increases to the owner or operator of the facil-
16 ity.

17 (F) IRON AND STEEL SECTOR OR SUBSEC-
18 TORS.—For the purposes of determining the
19 quantity of emission allowances to be distrib-
20 uted under this section to the owner or operator
21 of any iron and steel manufacturing facility in
22 a sector or subsector identified under subsection
23 (b), the Administrator shall differentiate be-
24 tween facilities using integrated iron and
25 steelmaking technologies (including coke ovens,

1 blast furnaces, and other iron-making tech-
2 nologies) and facilities using electric arc furnace
3 technologies when calculating sector or sub-
4 sector averages under subparagraphs (A) and
5 (B)(ii).

6 (2) OTHER ELIGIBLE ENTITIES.—The quantity
7 of emission allowances distributed by the Adminis-
8 trator for a calendar year to an owner or operator
9 of a facility in an eligible industrial sector or sub-
10 sector that is not a covered facility shall be equal to
11 the indirect carbon allowance factor for the facility,
12 as determined under paragraph (1)(B). Calculations
13 under this paragraph shall be based on data from 2
14 calendar years prior to the calendar year of distribu-
15 tion.

16 (3) NEW FACILITIES.—

17 (A) FIRST AND SECOND YEAR OF OPER-
18 ATION.—In the first and second year of oper-
19 ation of a facility in any sector or subsector
20 identified under subsection (b), the owner or
21 operator of such facility shall receive a quantity
22 of emission allowances under this Act equal to
23 emission allowances distributed under this Act
24 to the owner or operator of a comparable facil-
25 ity in the same sector or subsector that pro-

1 duces equivalent output using a substantially
2 similar production process, as determined by
3 the Administrator.

4 (B) SUBSEQUENT YEARS OF OPER-
5 ATION.—In the third year of operation of a fa-
6 cility in any sector or subsector identified under
7 subsection (b), the Administrator shall adjust
8 the quantity of emission allowances to be dis-
9 tributed to the owner or operator of such facil-
10 ity in such year to reconcile the total quantity
11 of allowances received during the first and sec-
12 ond years of operation to the quantity the facil-
13 ity would have received during the first and sec-
14 ond years of operation had the appropriate data
15 been available for such years.

16 **SEC. 6. REPORTS TO CONGRESS.**

17 Not later than one year after the first year in which
18 allowances are distributed pursuant to this Act, and at
19 least every two years thereafter, the Administrator, in con-
20 sultation with the Secretary of Commerce, the Secretary
21 of Energy, the Secretary of State, and the United States
22 Trade Representative, shall submit to Congress a report
23 on the carbon leakage of domestic energy-intensive indus-
24 trial manufacturers and the effectiveness of the distribu-
25 tion of emission allowances under section 5 in achieving

1 the purposes of this Act. Such reports shall include rec-
2 ommendations on how to better achieve the purposes of
3 this Act.

4 **SEC. 7. MODIFICATION OR ELIMINATION OF DISTRIBUTION**
5 **OF ALLOWANCES TO ENERGY-INTENSIVE**
6 **MANUFACTURING FACILITIES.**

7 (a) **PRESIDENTIAL DETERMINATION AND MODIFICA-**
8 **TION.**—If the President finds that international govern-
9 mental activities to reduce global greenhouse gas emis-
10 sions have substantially mitigated—

11 (1) the disadvantage to domestic manufacturers
12 of energy-intensive products subject to competition
13 from facilities in countries without commensurate
14 greenhouse gas regulation; and

15 (2) the carbon leakage and related diversion of
16 production of such products to facilities located in
17 countries without commensurate greenhouse gas reg-
18 ulation;

19 then the Administrator shall, pursuant to a rule, reduce
20 the amount of emission allowances distributed under this
21 Act in an amount reasonably calculated to achieve the pur-
22 poses of this Act.

23 (b) **TERMINATION.**—If the President determines that
24 the competitive disadvantage to domestic manufacturers
25 described in subsection (a) has been rendered insignifi-

1 cant, the Administrator shall terminate the distribution of
2 emission allowances under this Act.

○
