9 than 3,000,000 individuals in the United States that  
10 have glaucoma are aware that they have glaucoma.

1           (2) Glaucoma is the leading cause of blindness  
2 among African-Americans and Hispanics.

3           (3) Glaucoma is 6 to 8 times more common in  
4 African-Americans than in Caucasians.

9 tures, the cost of glaucoma to the United States gov-  
10 ernment is estimated to be over \$1.5 billion annu-  
11 ally.

12           (6) Poor vision costs Medicare more than \$2  
13 billion per year in non-eye-related illnesses and  
14 healthcare needs.

15           (7) Medicare currently provides coverage for  
16 glaucoma screenings for beneficiaries in the fol-  
17 lowing high risk groups:

18                   (A) Individuals with diabetes.

19                   (B) Individuals with a family history of  
20 glaucoma.

22 older.

23                   (D) Hispanics 65 years of age and older.

24           (8) Although Medicare has covered glaucoma
