

104th Congress, 1st Session - - - - - House Document 104-76

STATUS REPORT OF PROLIFERATION
OF CHEMICAL AND BIOLOGICAL WEAPONS

MESSAGE

FROM

THE PRESIDENT OF THE UNITED STATES

TRANSMITTING

A REPORT REGARDING ACTIVITIES TAKEN AND MONEY SPENT
PURSUANT TO THE EMERGENCY DECLARATION, PURSUANT TO
SECTION 204 OF THE INTERNATIONAL EMERGENCY ECONOMIC
POWERS ACT AND SECTION 401(c) OF THE NATIONAL EMER-
GENCIES ACT

MAY 18, 1995.—Message referred to the Committee on International
Relations and ordered to be printed

U.S. GOVERNMENT PRINTING OFFICE

99-011

WASHINGTON : 1995

To the Congress of the United States:

On November 14, 1994, in light of the dangers of the proliferation of nuclear, biological, and chemical weapons and their means of delivery ("weapons of mass destruction"), I issued Executive Order No. 12938 and declared a national emergency under the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*).

As I described in the report transmitting Executive Order No. 12938, the new Executive order consolidated the functions of and revoked Executive Order No. 12735 of November 16, 1990, which declared a national emergency with respect to the proliferation of chemical and biological weapons, and Executive Order No. 12930 of September 29, 1994, which declared a national emergency with respect to nuclear, biological, and chemical weapons, and their means of delivery. The new Executive order also expanded certain existing authorities in order to strengthen the U.S. ability to respond to proliferation problems.

The following report is made pursuant to section 204 of the International Emergency Economic Powers Act and section 401(c) of the National Emergencies Act regarding activities taken and money spent pursuant to the emergency declaration. Additional information on nuclear, missile, and/or chemical and biological weapons (CBW) nonproliferation efforts is contained in the annual report on the proliferation of missiles and essential components of nuclear, biological, and chemical weapons, provided to the Congress pursuant to section 1097 of the National Defense Authorization Act for Fiscal years 1992 and 1993 (Public Law 102-190), also known as the "Nonproliferation Report," and the annual report provided to the Congress pursuant to section 308 of the Chemical and Biological Weapons Control and Warfare Elimination Act of 1991 (Public Law 102-182).

The three export control regulations issued under the Enhanced Proliferation Control Initiative (EPCI) are fully in force and continue to be used to control the export of items with potential use in chemical or biological weapons or unmanned delivery systems for weapons of mass destruction.

In the 6 months since I issued Executive Order No. 12938, the number of countries that have ratified the Chemical Weapons Convention (CWC) has reached 27 (out of 159 signatory countries). I am urging the Senate to give its advice and consent to ratification as soon as possible. The CWC is a critical element of U.S. non-proliferation policy that will significantly enhance our security and that of our friends and allies. I believe that U.S. ratification will help to encourage the ratification process in other countries and, ultimately, the CWC's entry into force.

The United States actively participates in the CWC Preparatory Commission in The Hague, the deliberative body drafting adminis-

trative and implementing procedures for the CWC. Last month, this body accepted the U.S. offer of an information management system for the future Organization for the Prohibition of Chemical Weapons that will implement the CWC. The United States also is playing a leading role in developing a training program for international inspectors.

The United States strongly supports international efforts to strengthen the 1972 Biological and Toxin Weapons Convention (BWC). In January 1995, the Ad Hoc Group mandated by the September 1994 BWC Special Conference to draft a legally binding instrument to strengthen the effectiveness and improve the implementation of the BWC held its first meeting. The Group agreed on a program of work and schedule of substantive meetings, the first of which will occur in July 1995. The United States is pressing for completion of the Ad Hoc Group's work and consideration of the legally binding instrument by the next BWC Review Conference in 1996.

The United States maintained its active participation in the 29-member Australia Group (AG), which now includes the Czech Republic, Poland, Slovakia, and Romania. The AG reaffirmed in December the members' collective belief that full adherence to the CWC and the BCW provides the only means to achieve a permanent global ban on CBW, and that all states adhering to these Conventions have an obligation to ensure that their national activities support these goals.

The AG also reiterated its conviction that harmonized AG export licensing measures are consistent with, and indeed actively support, the requirement under Article I of the CWC that States Parties never assist, in any way, the manufacture of chemical weapons. These measures also are consistent with the undertaking in Article XI of the CWC to facilitate the fullest possible exchange of chemical materials and related information for purposes not prohibited by the Convention, as they focus solely on preventing assistance to activities banned under the CWC. Similarly, such efforts also support existing nonproliferation obligations under the BWC.

The United States Government determined that three foreign nationals (Luciano Moscatelli, Manfred Felber, and Gerhard Merz) had engaged in chemical weapons proliferation activities that required the imposition of sanctions against them, effective on November 19, 1994. Similar determinations were made against three foreign companies (Asian Ways Limited, Mainway International, and Worldco) effective on February 18, 1995, and imposed sanctions against them. Additional information on these determinations is contained in a classified report to the Congress, provided pursuant to the Chemical and Biological Weapons Control and Warfare Elimination Act of 1991. The United States Government continues to monitor closely activities that may be subject to CBW sanctions provisions.

The United States continued to control vigilantly U.S. exports that could make a contribution to unmanned delivery systems for weapons of mass destruction, exercising restraint in considering all such transfers consistent with the Guidelines of the Missile Technology Control Regime (MTCR). The MTCR Partners shared infor-

mation not only with each other but with other possible supplier, consumer, and transshipment states about proliferation problems and also stressed the importance of implementing effective export control systems.

The United States initiated unilateral efforts and coordinated with MTCR Partners in multilateral efforts, aimed at combatting missile proliferation by nonmembers and at encouraging nonmembers to adopt responsible export behavior and to adhere to the MTCR Guidelines. On October 4, 1994, the United States and China signed a Joint Statement on Missile Nonproliferation in which China reiterated its 1992 commitment to the MTCR Guidelines and agreed to ban the export of ground-to-ground MTCR-class missiles. In 1995, the United States met bilaterally with Ukraine in January, and with Russia in April, to discuss missile nonproliferation and the implementation of the MTCR Guidelines. In May 1995, the United States will participate with other MTCR Partners in a regime approach to Ukraine to discuss missile nonproliferation and to share information about the MTCR.

The United States actively encouraged its MTCR Partners and fellow AG participants to adopt "catch-all" provisions, similar to that of the United States and EPCI, for items not subject to specific export controls. Austria, Germany, Norway, and the United Kingdom actually have such provisions in place. The European Union (EU) issued a directive in 1994 calling on member countries to adopt "catch-all" controls. These controls will be implemented July 1, 1995. In line with the harmonization move, several countries, including European States that are not actually members of the EU, have adopted or are considering putting similar provisions in place.

The United States has continued to pursue this Administration's nuclear nonproliferation goals. More than 170 nations joined in the indefinite, unconditional extension of the Nuclear Non-Proliferation Treaty (NPT) on May 11, 1995. This historic decision strengthens the security of all countries, nuclear weapons states and non-weapons states alike.

South Africa joined the Nuclear Suppliers Group (NSG), increasing NSG membership to 31 countries. The NSG held a plenary in Helsinki, April 5-7, 1995, which focused on membership issues and the NSG's relationship to the NPT Conference. A separate, dual-use consultation meeting agreed upon 32 changes to the dual-use list.

Pursuant to section 401(c) of the National Emergencies Act, I report that there were no expenses directly attributable to the exercise of authorities conferred by the declaration of the national emergency in Executive Order No. 12938 during the period from November 14, 1994, through May 14, 1995.

WILLIAM J. CLINTON.

THE WHITE HOUSE, *May 18, 1995.*
