

it goes 250 miles, obviously it uses 12½ gallons of fuel and there is 2½ gallons left, and that was question A.

But here is the stunning thing. Let's look at the results. Let's go to the next slide. Only 34 percent of American eighth graders got that question right. Fifty percent of Korean eighth graders got it right. Seventy percent of eighth graders in Singapore got it right. So if you lengthen the school year, maybe you should work on specific math skills.

This has nothing to do with IQ. Nearly 100 percent of all the brains in the world will process this problem. Do not worry about whether we can do this. This is not an issue of whether we can achieve this level of excellence. We can easily do this. We just haven't.

And when we deprive our children of the capacity to do this, then there are all kinds of other processes that they can't absorb, and it blunts their capacity to learn later. So I want to see that number up at about 90, and the only way to do it is to try, and to test it. And we can do it.

Thank you very much.

NOTE: The President spoke at 1:12 p.m. in the gymnasium at Robert C. Byrd High School. In his remarks, he referred to Mary Helen Shields, senior at Robert C. Byrd High School, who introduced the President; Mayor Robert T. Flynn of Clarksburg; Gov. Cecil H. Underwood and former Gov. Gaston Caperton of West Virginia.

Remarks to High School Students in Clarksburg

May 22, 1997

The President. Thank you very much. Well, did you see it?

Audience members. Yes!

The President. On the screen and the Internet?

Audience members. Yes!

The President. Well, you may have had the better deal, because it's cooler in here. [Laughter] Let me thank Danny Phares for his introduction. And I want to say I'm glad to be here with Governor Underwood and with Secretary of Education Dick Riley and with Cleo Matthews, the president of the State board of education. And you may have heard me say that her daughter, Sylvia, who

is here today, is my Deputy Chief of Staff in the White House and she graduated from high school in Hinton, West Virginia.

So I think that's a pretty good statement of West Virginia's education quality. And I have to tell you, I did not have an auditorium this nice when I was in high school. I love this school. Congratulations on having a beautiful, beautiful school.

You hear the town hall meeting—I'm just going to come down here and shake hands with anybody who wants to come down and say hello. But I just want to say one thing to all of you. We are about to enter not only a new century but a new millennium, literally a time which happens once every thousand years. By coincidence, you are also entering a period in our history which will be very different from the past, different in the way people work, different in the way people learn, different in the way people relate to each other. And it can be the greatest moment of human promise in all history. It may be, if we do everything as we should, that young people your age and those coming along behind you will have more opportunities to live their dreams than any group of people who ever lived.

But none of this will happen unless we continue to put top priority on education, continue to believe that all young people can learn, and continue to be dedicated to the proposition that everybody should have a maximum opportunity to learn as much as possible. So when you leave this high school, I hope you will keep that conviction with you for the rest of your lives and be dedicated to the proposition that not only you but all the young people coming behind you should have those opportunities.

Thank you, God bless you, and good luck.

NOTE: The President spoke at 2:50 p.m. in the theater at Robert C. Byrd High School. In his remarks, he referred to Danny Phares, student body president.

Remarks to the Community of the Clarksburg Area

May 22, 1997

Thank you, West Virginia. Thank you for coming out today. It's wonderful; thank you.
