

and I am looking at that, because the general disaster assistance performers tends to be targeted to the big, grow-crop places in the Middle West primarily—not exclusively—as is natural, because that's where a lot of the big dollar-volume losses have been.

So we've got to go back and look, now, and see what we're doing, because we've got not only this flooding, but also, in this part of the country we've had the biggest drought that these farmers had ever had. So most of them—not most but a large number of farmers from Maryland north, in this country, had lost their crops before the flood came. So we need to look at that, and we will now go back, obviously, down to the Carolinas, and go upward and see where we are. And I'll do my best to work with Congress to get appropriate relief for them.

Thank you.

NOTE: The President spoke at 2:10 p.m. at the Federal Emergency Management Agency headquarters. In his opening remarks, he referred to Gov. Jim Hodges of South Carolina.

### **Statement on the Announcement of the Gates Millennium Scholarships**

*September 16, 1999*

I applaud the leadership and foresight shown by the Bill and Melinda Gates Foundation today with its \$1 billion pledge to provide full college scholarships for minority students in the fields of education, math, science, and engineering. These landmark scholarships will help address important needs: the need to encourage young people to become teachers, the need to ensure that our children are well-prepared in math and science, and the need to open the doors of higher learning to all students. The Gates Millennium Scholarships remind us what vital role philanthropies can play in American life and how urgent it is for all of us to invest now in our Nation's young people.

### **Statement on Robert E. Rubin's Acceptance of the Chairman of the Board Position at the Local Initiatives Support Corporation**

*September 16, 1999*

I am pleased that Bob Rubin has accepted the job as Chairman of the Board of LISC. This service is consistent with his longstanding commitment to bring economic opportunities to America's most underserved communities. His selection is not only a tremendous boost for LISC but also for those who advocate community economic development to ensure that all Americans share in our economic prosperity.

### **Statement on Transmitting the Montreal Protocol on Substances That Deplete the Ozone Layer to the Senate**

*September 16, 1999*

Today, on the International Day for the Preservation of the Ozone Layer, I am transmitting to the Senate for its advice and consent an amendment to the Montreal Protocol on Substances that Deplete the Ozone Layer.

Preservation of the ozone layer is critical to life on Earth. The Montreal Protocol has led to a dramatic reduction in the production and use of ozone-depleting chemicals, and scientists report that the ozone layer is on its way to recovery. The amendment I transmit today builds on this progress, in part by strengthening measures to promote compliance with the Protocol. I urge the Senate to approve this amendment.

It also is critical that the United States support efforts by developing countries to phase out their use of ozone-depleting chemicals. Regrettably, appropriations measures now before Congress would deny funds I have requested for the Montreal Protocol Fund, which has a long record of success in these efforts. I call on Congress to approve the funds needed to help preserve the Earth's protective ozone layer.

**Message to the Senate Transmitting  
the Montreal Protocol on Substances  
That Deplete the Ozone Layer**

*September 16, 1999*

*To the Senate of the United States:*

I transmit herewith, for the advice and consent of the Senate to ratification, the Amendment to the Montreal Protocol on Substances that Deplete the Ozone Layer (the "Montreal Protocol"), adopted at Montreal on September 15–17, 1997, by the Ninth Meeting of the Parties to the Montreal Protocol. The report of the Department of State is also enclosed for the information of the Senate.

The principal features of the 1997 Amendment, which was negotiated under the auspices of the United Nations Environment Program (UNEP), are the addition of methyl bromide to the substances that are subject to trade control with non-Parties; and the addition of a licensing requirement for import and export of controlled substances. The 1997 Amendment will constitute a major step forward in protecting public health and the environment from potential adverse effects of stratospheric ozone depletion.

By its terms, the 1997 Amendment was to have entered into force on January 1, 1999, provided that at least 20 states had deposited their instruments of ratification, acceptance, or approval. However, because this condition was not met until August 12, 1999, the 1997 Amendment will enter into force on November 10, 1999.

I recommend that the Senate give early and favorable consideration to the 1997 Amendment to the Montreal Protocol and give its advice and consent to ratification.

**Proclamation 7222—Citizenship Day  
and Constitution Week, 1999**

*September 16, 1999*

*By the President of the United States  
of America*

**A Proclamation**

The Constitution is perhaps our Nation's most cherished document, the compass that has helped us chart America's course toward freedom, human dignity, and democracy for more than 200 years. Its text, born of the genius and idealism of our Founders and hammered out through hard effort and compromise by the delegates to the Constitutional Convention, established a system of government capable of responding to the pressures of social and political change. It created a sacred covenant that continues to bind all our citizens by a set of principles based on the ideals of equality, inclusion, and independence and by a delicate balance of powers, rights, and responsibilities among citizens and their State and Federal Governments. Today, sustained by the efforts and sacrifices of generations of Americans, the U.S. Constitution remains as strong and vibrant a charter of freedom as it was at the time of its signing 212 years ago.

The 20th century has witnessed a great wave of migration of men and women to our Nation from all parts of the globe, attracted by the freedom, justice, and rule of law guaranteed by our Constitution. As they assume the responsibilities of American citizenship, they infuse our political process with fresh perspectives and enthusiasm and prove to the world that a diverse people can live in peace and progress. Today we are a Nation with new hopes, new dreams, and new people, but we are united by a devotion to the same democratic ideals that have guided us for over 200 years.

As we reflect upon America's past, we recognize that our country is still in the act of becoming the "more perfect union" envisioned by our Founders. Every generation of Americans has struggled to live up to our
