

make possible, as well as the successful dairy cooperative.

[At this point, a young woman asked a question which was translated as follows.]

The Interpreter. She feels that, yes, if a greater number of children in the village can learn computers, definitely they can get better jobs, but they would have to be provided with greater opportunities there, which they would have to struggle for or which the Government would have to provide for.

The President. Since I have been the President of the United States, I have traveled around the world and met in villages like this in Africa and Latin America, China, and now here in India. And my wife has done even more than I have. And we try to invest money in the education of girls to make sure that girls and boys both have the same chance to get an education. And this year we will finance around the world about 2 million of the kind of small loans you have been talking about.

But we are looking more and more at trying to make sure that every village has at least one computer hookup like this, and you have given me a lot of ideas. And I just want to congratulate you for your courage and your persistence. And I hope my coming here will cause everyone in India to know about what you are doing, and maybe more women will follow your lead.

Q. My name is Chitra, and I wanted to convey to you that, through the Women's Development Project, we are trying to create awareness among young girls so that when they grow older and they become women, they do not have to face many of the problems that we, as children, had to face, especially related to our bodies, our sexuality, and our noneconomic empowerment.

I think it is time to wind up. I will now request Kanta Guswami to give you a smart card, so that you can become a member of the daily cooperative here. [Laughter]

[At this point, Kanta Guswami presented the smart card.]

The President. I grew up in a place with many dairy cows. And I know what hard work it is. And I will always treasure this. And I will put this up in the White House so that

people from all over the world will know I have come here, and I can tell them the story of what you are doing.

Remarks in a Discussion With Members of Village Council in Nayla Village

March 23, 2000

Q. I have a question to ask. There is a stereotypical image of Indians all over the world as backward people. You have been in India for a few days. How would you respond to this? Do you think we are backward? [Laughter]

The President. No. But what I hope my trip will do is to help people all over the world see India in a more complete way. There are many people here who are poor, but you are proving that democracy can be used to lift the poor, can be used to end discrimination against women and keep children, girls and boys, in school, and can be used to bring people of different tribes and casts together. That is very important to me and to my family, my wife, who has been in Indian villages, and to our whole administration.

What I think you should know is that the problems you have here are problems that people have faced all over the world. My own country became independent from the British Empire in the 1780's, and it was almost 150 years before women could even vote. It was almost 100 years before the slaves were freed, and more than another 100 years before they acquired equal rights, African-Americans, under our laws.

And today, all over the world, there are wars where people are being killed—in Africa because they're of different tribes, in Bosnia and Kosovo because they were of different tribes and religions. So if in India you can prove that people can lift themselves from poverty and, at the same time, end discrimination against women and their girl children and learn to work together across tribal and cast lines because of democracy,

you will give the world the greatest gift it could have now.

The only other thing I would like to say is I believe that the computer will make it happen more quickly if it is used wisely and put in every village in this country. And I think that those of us who would like to be good partners and to help you must also listen to what you have said today.

The biggest public health problems I think in India and many other countries throughout the world are based on the fact that there's not enough clean water and too much of the soil is washing away or blowing away in the wind.

And the last thing I would like to say is I hope you will not lose your enthusiasm and your spirit when things don't change as fast as you would like. I know it is easy to get discouraged. I know there is still injustice and unfairness. But what you are doing is astonishing. And you have a chance to overcome problems that are still crippling other places in the world more quickly because you have these institutions of democracy. You must believe in them and use them and not give up when you're frustrated and cannot succeed in a short time.

Thank you very much.

Remarks at the Mahavir Trust Hospital in Hyderabad, India

March 24, 2000

Thank you very much. Good morning, Chief Minister Naidu. Thank you for welcoming me today to your State and to this magnificent city. Dr. Aruna, thank you for your remarks and for your work. Dr. Kolluri, to Ms. Rachel Chatterjee, the Minister of Health and the other ministers of the Government that are here; to the staff of the Mahavir Trust Hospital, I thank you all for your dedication and for making me and our American delegation so welcome.

I am honored to be joined today by my daughter, by the American Ambassador to India, Mr. Celeste, and his wife, Jacqueline

Lundquist; by the Secretary of Commerce Bill Daley, and the Administrator of our Agency for International Development Brady Anderson; and by six distinguished Members of our Congress: Congressman Gary Ackerman and Representative Nita Lowey from New York; Congressman Jim McDermott from Washington; Congressman Ed Royce from California; Congressman Sheila Jackson Lee from Texas; and Representative Jan Schakowsky from Illinois. We are delighted to be here, and we are very interested in what you are doing and impressed. And we thank you.

We come today to celebrate a success story and to join with you in meeting a new challenge. As Dr. Aruna said, the success story is the virtual complete eradication of polio from the face of the Earth. In 1987, India reported 27,000 cases of this crippling disease. Today only 1,000 Indians are afflicted, and as you have just heard, there are no reported new cases this year.

India has collaborated in this effort with Rotary International, with the Gates Foundation, with UNICEF, the World Health Organization, and with the U.S. Agency for International Development, or AID.

I would like to say just a special word of appreciation to our Agency for International Development. It has meant a great deal to America's partnership on a very human level with people all across the world and especially here in India. It has guided our efforts to fight diseases that threaten children, to launch the Green Revolution that helped India achieve self-sufficiency in agriculture and even more, to provide education, so that parents in India and throughout the world can determine the size of their families and keep their children in school, and to support great Indian universities, like IIT.

Now, we believe that USAID will be just as critical and just as active as India and the United States embark on a dynamic new partnership, as we face new challenges, like developing the sources of clean energy, bringing the Internet to rural India so all its children can reach out to the world.

So I'd like to say a special word of thanks today to our AID Administrator, Brady Anderson, and B.A. Rudolph and the other members of the AID team who are here.
