

lot about these technological issues that we're going to have to face. For example, we've got to close the digital divide. Wouldn't you like to have somebody as President who knew how to do it, and who had been working on it for 6 or 7 years?

We've got to deal with the privacy issues. We're all going to have all our records on computers, all our financial records, all our health care records. If you had to put up health care records to get health insurance, don't you think there ought to be some limit to who gets access to them? Shouldn't you have to give your own permission before you give them up? Do you think you ought to be denied a job because somebody can log onto the Internet and find out something about you your first cousin may not know? These are big issues.

So anyway, I realize this is not a traditional political speech; this is a conversation. But you just remember what I told you. It's a real big election, real big issues, honest differences—not bad guys and good guys, honest differences. And if people know what they are, we'll win. That's what you have to help us do.

Thank you, and God bless you.

NOTE: The President spoke at 2:10 p.m. in Salon 1 at the Ritz Carlton Hotel. In his remarks, he referred to luncheon cohosts Fred DuVal and Steve Owens; Edward G. Rendell, general chair, Democratic National Committee; Secretary of the Interior Bruce Babbitt and his wife, Hattie Babbitt, Deputy Administrator, U.S. Agency for International Development; Janet Napolitano, Arizona attorney general; Thomas Patterson, professor of government and the press, John F. Kennedy School of Government, Harvard University; and Gov. Jane Dee Hull of Arizona.

Statement on Proposed School Modernization Legislation

June 22, 2000

Every year that Congress stalls on passing critical school modernization legislation is another year our children have to go to class in trailers, in crowded classrooms, in crumbling schools. A new U.S. Department of Education survey of the condition of American schools gives cause for concern. Rising enrollments and years of deferred maintenance

have taken a serious toll, jeopardizing our children's health and the quality of their education. According to the report, our schools require \$127 billion in repairs and 3.5 million students attend school in buildings that need to be replaced altogether.

Children cannot learn in crumbling schools. It is clear that additional resources are needed to accommodate record enrollments and allow smaller classes. I have called on Congress to enact my proposal to repair 25,000 schools over the next 5 years. In addition, I have proposed a school construction tax cut that would help communities build and modernize 6,000 schools. Representatives Charles Rangel and Nancy Johnson have introduced legislation to do just that. While there is broad bipartisan support for this key school modernization legislation, congressional leaders have refused to even bring it to a vote. Congress should act now to give all our children the safe, modern, world-class schools they deserve.

Statement on Proposed Legislation To Bolster Enforcement of Gun Laws

June 22, 2000

Today the House has an opportunity to bolster our efforts to fight gun crime in America as it considers the Commerce, Justice, State appropriations bill. In its current form, the bill severely underfunds my \$280 million national gun enforcement initiative—including funding for 1,000 new State and local gun prosecutors, anti-gun violence media campaigns, and smart gun technology. I urge the House to pass Representative Lowey's amendment to provide \$150 million to hire State and local gun prosecutors to put more gun criminals behind bars.

Yesterday the Treasury Department released its first-ever gun ATF gun trafficking report demonstrating my administration's commitment to tough gun enforcement and the need to close deadly loopholes in our laws that make gun shows and corrupt dealers favorite supply channels for illegal traffickers. Congress can take immediate action to address these issues and make progress in the fight to reduce gun violence. Instead, the

House attempted to undermine the administration's historic gun safety agreement with Smith & Wesson last night. Despite the failure of this attempt, the Republican leadership continues its assault on this agreement at a time when our Nation loses nearly 12 children per day in gunfire.

We should be doing all we can to move forward in the fight to reduce gun violence, not backward. I urge Congress to focus on measures that will improve public safety by fully funding my national gun enforcement initiative to give law enforcement even more tools to crack down on gun criminals. And Congress should finally pass the stalled commonsense gun safety legislation to close the gun show loophole and take other steps to keep guns out of the wrong hands.

Statement on the Shootings of Government Meat Inspectors

June 22, 2000

I was shocked and saddened to learn of the tragic shootings of three government inspectors, including two U.S. Department of Agriculture employees, in California. The Federal Government is working closely with local authorities on this matter. This grievous act was committed against dedicated individuals who were working to ensure the public's health and safety. I want to join all Americans in extending our thoughts and prayers to the victims and their families and coworkers.

Letter to Congressional Leaders on National Long-Term Energy Needs

June 22, 2000

Dear Mr. Speaker: (Dear Mr. Leader:)

With so much attention focused on the recent spike in gasoline prices and OPEC's decision to increase production quotas, it is critical that we not lose sight of our nation's long-term energy needs. For seven years, my Administration has pursued a sound, comprehensive policy to address those needs. Regrettably, several key elements of this Administration's strategy have languished in Congress. In recent days, in fact, budget initiatives to strengthen our energy supply have

suffered significant cuts, while some Members have advanced proposals that would seriously harm our environment in the name of energy security. I urge you to work closely with me to enact these critical energy proposals without further delay.

I remain very concerned about high gasoline prices and find the situation in the Chicago/Milwaukee region particularly troubling. Last week, the Department of Energy (DOE) and the Environmental Protection Agency sent analysts to the region to explore the reasons for this price differential. While a number of factors appear to have contributed to the unusually high prices in the region, it is possible that they may not account for the entire increase in gas prices. The Federal Trade Commission has initiated an investigation of pricing practices in the region to determine if there is any unfair or illegal activity there. We look forward to the results of these investigations.

Our concern about high gasoline prices in the short-term, however, cannot be allowed to distract us from addressing the long-term energy needs of our nation. My Administration has pursued an energy policy that provides a comprehensive and balanced approach to addressing the nation's energy needs. Unfortunately, Congress is considering proposals that are unnecessary and would do irrevocable harm to the environment, such as opening the Arctic refuge to drilling. Instead, Congress should act on the following key pieces of my energy policy.

First, I have proposed a \$4 billion package of tax incentives to encourage consumers to purchase more efficient cars, homes, and consumer products. Congress has failed to enact this package for over two years, even though these tax credits would save consumers money, protect our environment, and reduce our dependence on foreign oil. I also have proposed tax incentives to support renewable energy and the domestic oil industry, including the expensing of geological and geophysical expenses and delay rental payments.

Second, over the past seven years I have repeatedly proposed significant increases in Federal investments in responsible domestic sources of energy, including most recently \$1.4 billion in FY 2001 for high-priority items
