

of Defense, the Food and Drug Administration, other Federal agencies, and private companies are working hard to discover the causes of ovarian cancer and to design more effective screening and treatment options. Through their research, we hope to learn how to reduce the chances of developing this disease, how to recognize it in its earliest stages, and how to successfully treat women in every stage of ovarian cancer. The vision and determination of these professionals, along with the courage of the women who participate in clinical trials, are helping to turn today's research advances into tomorrow's success stories.

My Administration remains committed to supporting research efforts to help find a cure for ovarian cancer. My fiscal year 2004 budget proposal includes more than \$5.6 billion for cancer research at the National Institutes of Health. This investment will lead to a better understanding of ovarian cancer and greater hope for women who suffer from this disease. Through education and continued research, we can win the fight against ovarian cancer and save the lives of thousands of American women.

**Now, Therefore, I, George W. Bush,** President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim September 2003 as National Ovarian Cancer Awareness Month. I call upon the people of the United States to observe this month with appropriate programs and activities.

**In Witness Whereof,** I have hereunto set my hand this first day of September, in the year of our Lord two thousand three, and of the Independence of the United States of America the two hundred and twenty-eighth.

**George W. Bush**

**Proclamation 7700—National Prostate Cancer Awareness Month, 2003**

*September 1, 2003*

*By the President of the United States of America*

**A Proclamation**

Prostate cancer is the second most common form of cancer among men in the United States. This year alone, it is estimated that more than 220,000 new cases of prostate cancer will be diagnosed and that nearly 29,000 men will die from this disease. During National Prostate Cancer Awareness Month, we seek to increase understanding about the risk factors of prostate cancer, the importance of a healthy lifestyle, and the benefits of detecting the disease in its earliest stages, when it is most treatable.

Although the exact cause of prostate cancer is unknown, several factors have been found to increase the risk of developing this disease. Men aged 65 years or older make up about 70 percent of all diagnosed prostate cancer cases. In addition, a man's risk of developing prostate cancer doubles if a father or brother has been diagnosed with the disease.

Making healthy choices is critical to prevent prostate cancer and many other diseases. Research suggests that some men may be able to reduce their risk of prostate cancer by eating healthy foods and exercising on a regular basis.

Early detection is important in successfully treating prostate cancer. Preventative screenings can reveal a man's current health status and identify whether he needs to adjust his diet or behavior. I urge men, particularly those over 50, to learn more about the disease and to talk to their doctors about when to start preventative screening. Healthcare providers can advise men as to which tests are most appropriate. Through early detection and treatment, we can reduce the number of deaths caused by prostate cancer.

Today, our Nation is on the leading edge of new discoveries. As we continue to make

advancements in medicine, my Administration remains committed to learning the causes of prostate cancer and finding a cure. My fiscal year 2004 budget proposal includes more than \$13 million for the Centers for Disease Control and Prevention to conduct, support, and promote efforts that increase awareness of screening and early detection, and more than \$5.6 billion for cancer research at the National Institutes of Health. Through my HealthierUS Initiative, my Administration is also encouraging all citizens to lead healthier lives by eating right, exercising, and taking advantage of preventative screening. By working together, we will improve our ability to prevent, treat, and cure prostate cancer.

**Now, Therefore, I, George W. Bush,** President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim September 2003 as National Prostate Cancer Awareness Month. I call upon government officials, businesses, communities, healthcare professionals, educators, volunteers, and all people of the United States to reaffirm our Nation's strong and continuing commitment to prevent, treat, and cure prostate cancer.

**In Witness Whereof,** I have hereunto set my hand this first day of September, in the year of our Lord two thousand three, and of the Independence of the United States of America the two hundred and twenty-eighth.

**George W. Bush**

**Message to the Senate Transmitting the Protocol to the Denmark-United States Treaty of Friendship, Commerce, and Navigation**  
*September 2, 2003*

*To the Senate of the United States:*

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Protocol to the Treaty of Friendship, Commerce, and Navigation Be-

tween the United States and Denmark of October 1, 1951, signed at Copenhagen on May 2, 2001. I transmit also, for the information of the Senate, the report of the Department of State with respect to this protocol.

The protocol will establish the legal basis by which the United States may issue treaty-investor (E-2) visas to qualified nationals of Denmark, by supplementing the U.S.-Denmark friendship, commerce, and navigation (FCN) treaty to allow for entry and sojourn of investors, a benefit provided in the large majority of U.S. FCN treaties. United States investors are already eligible for Danish visas that offer comparable benefits to those that would be accorded nationals of Denmark under E-2 visa status.

The United States has long championed the benefits of an open investment climate, both at home and abroad. It is the policy of the United States to welcome market-driven foreign investment and to permit capital to flow freely to seek its highest return. Denmark also provides an open investment climate. Visas for investors facilitate investment activity, and thus directly support U.S. policy objectives.

I recommend that the Senate consider this protocol as soon as possible, and give its advice and consent to ratification of the protocol at an early date.

The White House,  
September 2, 2003.

**Remarks at a Signing Ceremony for the Chile and Singapore Free Trade Agreements**

*September 3, 2003*

Good afternoon. Thanks for coming. I'm honored to welcome you to the White House, and I'm pleased that you could join us today as the United States takes an important step to promote economic growth, to bring lower prices to American consumers, and to generate high-wage jobs for American workers.

With the agreements I sign today, America's economic relationships with Chile and Singapore will be based on free trade, and we will be bound even closer to two of our
