

**Memorandum on Determination  
To Authorize Drawdown for  
Afghanistan**

December 16, 2003

Presidential Determination No. 2004-15

*Memorandum for the Secretary of State, the  
Secretary of Defense*

*Subject:* Determination to Authorize  
Drawdown for Afghanistan

Consistent with the authority vested in me by the Constitution and laws of the United States, including section 202 and other relevant provisions of the Afghanistan Freedom Support Act (Public Law 107-327) and section 506 of the Foreign Assistance Act of 1961, as amended, 22 U.S.C. 2318, I hereby direct the drawdown of up to \$135 million of defense articles, defense services, and military education and training from the Department of Defense for the Transitional Islamic State of Afghanistan.

The Secretary of State is authorized and directed to report this determination to the Congress and to arrange for its publication in the *Federal Register*.

**George W. Bush**

**Remarks on the 100th Anniversary of  
the Wright Brothers' First Flight at  
Kill Devil Hills, North Carolina**

December 17, 2003

Thank you all very much. Rain will never dampen our spirits. I'm honored to be here, and I'm honored to be in the great State of North Carolina.

Madam Secretary, thank you for your fine leadership and your friendship. Secretary Mineta, thank you for your great leadership, as well. I'm proud that you're serving in my Cabinet. Mr. Governor, I appreciate your kind comments. I appreciate the values you hold dear to your heart, and I thank you for leading this great State.

To John Travolta, we shall call him "Moon Man" from now on. I appreciate your friendship. I appreciate your love of flight. Thank you for being such a fine entertainer for millions of Americans, but most importantly,

thanks for being a great American. I'm proud you're here.

I appreciate the fact that the Secretary of the Navy, Gordon England, is here. The Secretary of the Air Force, James Roche, is traveling with me today. I appreciate Sean O'Keefe, who is the Administrator of NASA, who has come today. I thank all members of my administration who have joined us. I hope you were smart enough to have brought an umbrella. [*Laughter*]

I know we've got Members of the Congress who are here. Senate Majority Leader Bill Frist from Tennessee is with us today. Senator Frist, thank you for coming. Senator Elizabeth Dole from the great State of North Carolina is with us. Senator Dole, thank you for being here. All Members of Congress from North Carolina and from other States, thank you for being here. I know we've got mayors and State officials.

I appreciate so very much American heroes who are here, well-known and not so well-known heroes. Let me name four of the well-known heroes who are here: Neil Armstrong; Buzz Aldrin; John Glenn; one of the great fighter pilots ever, Chuck Yeager, is with us today. We're honored to be in your presence. Thank you for being pioneers.

I'm also pleased that we're joined by Stephen Wright and Amanda Wright Lane, who both bear one of the great American names.

Powered flight has advanced in ways that could not have been imagined on December 17, 1903. And in the future, flight will advance in ways that none of us can imagine as we stand here today. Yet always, for as long as there is human flight, we will honor the achievement of a cold morning on the Outer Banks of North Carolina by two young brothers named Orville and Wilbur Wright.

Orville Wright lived to see the days of barnstorming and military aviation, the jet engine, commercial airlines, and the DC-3. The thrill of his life, however, was surely right here when he felt that first lift of the wing. He flew just 12 seconds and 40 yards, moving so slowly that his older brother ran alongside. And later in the day, with Wilbur at the controls, the machine stayed in the air for 59 seconds and traveled 852 feet. Yet everyone who was here at that hour sensed that a great line had been crossed and the

world might never be the same. A local boy named Johnny Moore was one of the witnesses. He ran down the beach and said, "They done it. They done it. Damned if they ain't flew!"

The anniversary now observed might have fallen a few days earlier, on the 13th. But December the 13th, 1903, was a Sunday, and the brothers had promised their dad they wouldn't attempt to fly on the Sabbath. And on the day they did fly, just like today, the conditions were not ideal. But they went ahead anyway, so they could get home to Dayton, Ohio, for Christmas.

Orville and Wilbur were, in so many ways, ordinary Americans, and hearing of their plans, a lot of folks must have thought those boys should have stayed in the bicycle business. The story is told of a newspaper editor who heard what the Wright brothers had been up to. He said, "Man will never fly, and if he does, he won't be from Dayton." [Laughter]

The United States Patent Office also had its doubts. So many others had submitted plans and models of flying machines that when the brothers sent in theirs, patent officials had a ready response. The office concluded the plans were inadequate and the machine could never function as intended. The New York Times once confidently explained why all attempts at flight were doomed from the start. To build a flying machine, declared one editorial, would require "the combined and continuous efforts of mathematicians and mechanics from 1 million to 10 million years." As it turned out, the feat was performed 8 weeks after the editorial was written. And not only did the machine perform its function, that little wood and canvas aircraft had brought together all the essentials that still give flight to every modern aircraft, from a single-prop plane to Air Force One.

The Wright brothers had some disappointments along the way, and there must have been times when they had to fight their own doubts. They pressed on, believing in the great work they had begun and in their own capacity to see it through. We would not know their names today if these men had been pessimists. And when it was over, they marveled at their own achievement. As

Orville wrote in a letter to a friend, "Isn't it astounding that all these secrets have been preserved for so many years just so we could discover them."

The Wright brothers' invention belongs to the world, but the Wright brothers belong to America. We take special pride in their qualities of discipline and persistence, optimism and imagination—of people like them and a lot of other people throughout our history. So many great inventions arose in this country, and so many of the great inventors came from unlikely backgrounds. The Wright brothers had their storefront bicycle shop. Thomas Edison was a newsboy. Eli Whitney and Henry Ford worked as farm hands. George Washington Carver was born a slave. There is something in the American character that always looks for a better way and is unimpressed when others say it cannot be done. Those traits still define our Nation. We still rely on men and women who overcome the odds and take the big chance with no advantage but their own ingenuity and the opportunities of a free country.

A great American journey that began at Kitty Hawk continues in ways unimaginable to the Wright brothers. One small piece of their Flyer traveled far beyond this field. It was carried by another flying machine, on *Apollo 11*, all the way to the Sea of Tranquility on the Moon. These past 100 years have brought supersonic flights, frequent space travel, the exploration of Mars, and the *Voyager One* spacecraft, which right now is moving at 39,000 miles per hour toward the outer edge of our solar system. By our skill and daring, America has excelled in every area of aviation and space travel. And our national commitment remains firm: By our skill and daring, we will continue to lead the world in flight.

This day, however, is one for recalling an heroic event in the history of our Nation and in the story of mankind. Here at the Wright Brothers National Memorial, we remember one small machine, and we honor the giants who flew it.

May God bless you all, and may God continue to bless America.

NOTE: The President spoke at 9:37 a.m. at the Wright Brothers National Memorial. In his remarks, he referred to Secretary of the Interior

Gale A. Norton; Secretary of Transportation Norman Y. Mineta; Governor Michael F. Easley of North Carolina; and actor John Travolta, who served as master of ceremonies.

**Proclamation 7745—Wright Brothers Day, 2003**

*December 17, 2003*

*By the President of the United States of America*

**A Proclamation**

A spirit of exploration and discovery has been a part of the American character since our founding days. Orville and Wilbur Wright exemplified this spirit when they made the dream of human flight a reality on December 17, 1903. On Wright Brothers Day, we honor the vision of these bicycle mechanics from Dayton, Ohio, and celebrate the centennial of manned, powered flight.

One hundred years ago, the Wright brothers changed our world with their 12-second, 120-foot flight in North Carolina. Their achievement inspired other aviation pioneers and marked the beginning of a new era of freedom. Since that first flight, aviation and aerospace technology has advanced at a remarkable pace, allowing us to fly across oceans, break the sound barrier, orbit the Earth, land on the moon, and study our universe in a way our ancestors could not have imagined. Each new generation of engineers and other inventors, following in the Wright Brothers' footsteps, continues to move the technology of flight further.

Today, air transportation touches the lives of people throughout the United States, and helps unite the American people. Air transportation brings families and friends together, delivers aid to those in need, and facilitates industry and commerce.

As we look to the future, we remember the extraordinary accomplishments of the Wright Brothers. Their determination and innovation continue to inspire us as we embark on the second century of flight.

The Congress, by a joint resolution approved December 17, 1963 (77 Stat. 402; 36 U.S.C. 143) as amended, has designated December 17 of each year as "Wright Brothers Day" and has authorized and requested the

President to issue annually a proclamation inviting the people of the United States to observe that day with appropriate ceremonies and activities.

**Now, Therefore, I, George W. Bush**, President of the United States of America, do hereby proclaim December 17, 2003, as Wright Brothers Day.

**In Witness Whereof**, I have hereunto set my hand this seventeenth day of December, in the year of our Lord two thousand three, and of the Independence of the United States of America the two hundred and twenty-eighth.

**George W. Bush**

[Filed with the Office of the Federal Register, 8:45 a.m., December 22, 2003]

NOTE: This proclamation will be published in the *Federal Register* on December 23.

**Executive Order 13321—  
Appointments During National  
Emergency**

*December 17, 2003*

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the National Emergencies Act (50 U.S.C. 1601 *et seq.*), and section 301 of title 3, United States Code, and in order to further respond to the national emergency I declared in Proclamation 7463 of September 14, 2001, I hereby order as follows:

**Section 1. Emergency Appointments Authority.** The emergency appointments authority at section 603 of title 10, United States Code, is invoked and made available to the Secretary of Defense in accordance with the terms of that statute and of Executive Order 12396 of December 9, 1982.

**Sec. 2. Judicial Review.** This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by a party against the United States, its departments, agencies, entities, officers, employees or agents, or any person.
