

settled through court annexed alternative dispute resolution programs.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply:* It is estimated that information will be collected on 1,500 civil cases concluded by trial in 2005 in which either the plaintiff or defendant filed a notice of appeal to an intermediate appellate court or court of last resort. Information will also be collected on the number of cases filed and disposed in court annexed alternative dispute resolution programs. Annual cost to the respondents is based on the number of hours involved in providing information from court records for the intermediate appellate court, court of last resort, and alternative dispute resolution forms. Public reporting burden for this collection of information is estimated to average 1.5 hours per data collection form for the intermediate appellate court and court of last resort forms and 2 hours for the alternative dispute resolution forms. The estimate of hour burden is based on prior civil justice data collections and pre-tests of the current forms.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated public burden associated with this collection is 830 hours. It is estimated that on-site data collection will be necessary for about 500 of the 1,500 civil appeals. Hence, the estimated burden hour to complete each of the appellate data collection forms will result in a total of 750 burden hours to complete the CJSSTCA (500 data collection forms multiplied by 1.5 hours per form = 750 burden hours). In addition to the case level appellate data collection forms, it is estimated that 40 appellate courts will have some form of court—annexed alternative dispute resolution (ADR) program. The estimated burden hour to complete the ADR spreadsheets for the participating appellate courts will result in a total of 80 burden hours to complete the ADR portion of this project: (40 appellate courts with ADR programs multiplied by 2 hours per coding spreadsheet = 80 burden hours). Therefore, the total burden hours for the CJSSTCA amounts to 830 burden hours (750 burden hours to complete the case level appellate forms +80 hours to complete the ADR spreadsheets).

SUPPLEMENTARY INFORMATION:

I. *Background:* Job Corps is an intensive, residential training program for at-promise youth age 16 through 24 to address multiple barriers to employment faced by youth throughout the United States. Job Corps is authorized by Title I, Subtitle C, of the Workforce Investment Act (WIA) of 1998. The program is principally carried out through a nationwide network of 122 Job Corps centers. The centers are located at facilities either owned or leased by the Federal Government. The Department has a direct role in the operation of Job Corps, and does not serve as a pass-through agency for this program. It is the Department's responsibility to establish Job Corps centers and to select operators for them. Of the 122 current centers, 28 are operated by the Departments of Agriculture and the Interior, through interagency agreements. These centers are located on Federal lands controlled by these two agencies. The remaining 94 centers are managed and operated by large and small corporations and nonprofit organizations selected by the Department in accordance with the Federal Acquisition Regulations, and in most cases through a competitive procurement process. Many of the current contractors manage and operate more than one center.

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- * Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
